

2023 Traffic Safety Improvements

Dear Neighbor,

The City of Minneapolis is leading a project which will deliver Traffic and Pedestrian Safety Improvements to the intersection of Cedar Avenue and Minnehaha Parkway:

Project Highlights

The Traffic Safety Improvements project will upgrade traffic signal infrastructure and improve the pedestrian space to current standards. The project will include:

1. Improved traffic signal visibility
2. Curb extensions (also known as curb bump-outs) to expand pedestrian space at intersection corners
3. Accessible Pedestrian Signals (APS)
4. Pedestrian curb ramps which comply with the Americans with Disabilities Act (ADA)
5. LED Lighting on traffic signal poles

Example Illustration – Exact designs vary by location

The project will also remove vehicle access to Cedar Avenue from the existing Parkway frontage road north of the intersection. All driveway access will remain open. Full access at the Cedar Avenue & Minnehaha Parkway traffic signal will be maintained following the project.

Project Schedule

- April 2023: Construction of temporary wood pole signals to maintain signalization during construction
- Spring – Summer 2023: Sidewalk and intersection corner construction
- Summer 2023: Construction of new traffic signals

Vehicle traffic on Minnehaha Parkway will be detoured during portions of the project. Pedestrian access will be maintained at all times. Temporary traffic and parking impacts will be posted prior to construction activities.
